

LEXAN™ CLINIWALL™ SHEETS WIN GOLD AWARDS FROM PMMT AS FRIENDLY MATERIALS®

Two LEXAN™ CLINIWALL™ sheet grades from SABIC's Functional Forms business have won gold awards from PMMT Healthcare Architecture as Friendly Materials® products, acknowledging their position among the healthiest building materials available.

LEXAN™ CLINIWALL™ AC6206 sheet, designed for interior wall cladding, received a score of 75 out of 77, and LEXAN™ CLINIWALL™ C6206 sheet for interior wall cladding earned a score of 73 out of 77. These prestigious awards highlight SABIC's commitment to enhancing building design and promoting a healthier experience in indoor spaces, including hospitals and industrial and public facilities, through hygienic materials.

LEXAN™ CLINIWALL™ AC6206 sheet was tested at independent test houses against ISO 22196 – “Measurement of Antimicrobial Activity on Plastics / Non-Porous Surfaces” – the industry standard for measuring Antimicrobial activity on Plastics. The silverion additive activity was confirmed by this testing and showed a significant reduction in the growth of microorganisms on the sheet surface.

Friendly Materials® Inspired by PMMT is the result of a three-year research project to identify the healthiest building materials that use non-toxic materials. For instance, LEXAN CLINIWALL engineered thermoplastic panels feature non-halogenated flame retardancy and are volatile organic compound (VOC) duty free.

Wall cladding solutions for hygienic surfaces for hospitals, industrial and public facilities.

As our authorized distribution partner, you can promote the Friendly Materials® certificates from PMMT for LEXAN™ CLINIWALL™ Sheets to your customers. Don't hesitate to contact us if you need additional information or support for your projects.
